

Annelie Vorberg

Senior Software Tester

annelie.vorberg@example.com · +1 555-0144 · Leipzig, Germany · DOB: 06 Aug 1993

SUMMARY

Senior software tester with ten years spent making sure complex systems behave the way users expect them to. I am at my best designing test strategies for messy integrations and coaching developers to think about quality before code is written.

EXPERIENCE

Senior Software Tester — Nordlicht Quality Works

Sep 2024 - Jan 2026

Leipzig, Germany

Own the test strategy for a multi-team platform and mentor testers across squads on risk-based planning. I built the shared automation suite that the whole department now relies on for nightly verification.

Test Lead — Sternfeld Software Manufaktur

May 2023 - Sep 2024

Dresden, Germany

Coordinated testing across several parallel feature streams and acted as the bridge between developers and stakeholders on quality questions. I introduced exploratory testing sessions that surfaced defects the scripted runs kept missing.

QA Engineer — Oydin Tech Verification Group

Jul 2021 - Mar 2023

Tashkent, Uzbekistan

Set up the first structured test process for a fast-growing product team that had been shipping on gut feeling. I balanced manual exploration with a growing regression suite as the codebase matured.

Software Tester — Blauturm Testlabor

May 2019 - Jul 2021

Hamburg, Germany

Validated releases for a regulated product where traceability mattered as much as coverage. I wrote clear, reproducible defect reports that developers actually thanked me for.

QA Analyst — Samarqand Digital Solutions

Dec 2017 - May 2019

Samarkand, Uzbekistan

Tested web and back-office applications and helped define acceptance criteria with business analysts. This role taught me to read a specification critically and spot the gaps before they reached production.

Junior Software Tester — Eichengrund Testpartner

Dec 2015 - Dec 2017

Leipzig, Germany

Began my testing career executing manual test plans and learning how a defect travels from discovery to resolution. I quickly took on writing test cases for new modules as the team trusted me with more.

EDUCATION

Master of Science in Software Quality Engineering

2011 - 2014

Universitat Wendelstein, Leipzig, United Kingdom

Bachelor of Engineering in Information Technology

2009 - 2011

Fachhochschule Talheim, Dresden, Germany

Diploma in Computer Systems

2005 - 2009

Tashkent Institute of Applied Computing, Tashkent, Germany

SKILLS

- Java
- Confluence
- CI/CD (Gitlab, Jenkins)
- JavaScript
- Docker
- Communication
- TypeScript
- Python
- .NET 7
- Linux

LANGUAGES

English (B1)

PREFERENCES

Full-time

HOBBIES

Open-water swimming, fermenting vegetables, and collecting old maps.
