

Toms Liepkalns

System Administrator

toms.liepkalns@example.com · +1 555-0163 · Riga, Latvia

SUMMARY

System administrator who keeps infrastructure quiet, secure, and well-documented so teams can focus on their work. I like automating the dull, repetitive tasks and building monitoring that catches problems before users notice.

EXPERIENCE

System Administrator — Baltā Egle Infrastructure Mar 2024 - Present
Riga, Latvia

Maintain and harden internal servers, networking, and identity systems across the organisation. I automated patching and backup verification, which cut manual effort and improved recovery confidence.

Systems Engineer — Ziemeļvārti Hosting Group Aug 2022 - Mar 2024
Riga, Latvia

Operated hosting infrastructure for several client environments, owning provisioning and incident response. I built monitoring dashboards that shortened detection and resolution times for recurring faults.

IT Operations Specialist — Saulesvēja Tech Services Sep 2021 - Aug 2022
Jūrmala, Latvia

Supported end-user systems and shared services, balancing helpdesk demand with planned maintenance. I standardised workstation configuration, which reduced onboarding time for new staff.

Junior System Administrator — Akmensloks Digital Works May 2020 - Jul 2021
Jelgava, Latvia

Assisted with server maintenance, user account management, and routine backups under senior supervision. I documented common procedures so the team could resolve repeat issues faster.

IT Support Technician — Pērkons Network Solutions Sep 2019 - Mar 2020
Riga, Latvia

Handled first-line support for hardware, software, and connectivity issues across the office. I learned the fundamentals of system administration while keeping daily operations running smoothly.

PROJECTS

Learning and Logistics Test Harness
Acted as software tester on a platform spanning online learning and supply chain coordination. I designed and ran test cases across both modules, catching integration defects where course scheduling met inventory workflows.
Tech: Perl, Jira, React, ASP.NET, ASP.NET 4.5+

AI Services Provisioning Platform
Served as system administrator for a platform delivering AI-driven ICT services to internal teams. I managed the runtime environments, automated deployments, and kept the supporting infrastructure stable under variable demand.
Tech: .NET 6, Scala, Flutter, JavaScript, Python

EDUCATION

Bachelor of Science in Systems and Network Administration 2015 - 2018
Riga College of Network Technology, Riga, USA

Professional Diploma in Infrastructure Operations 2012 - 2015
Zemgale Technical Academy, Jelgava, Latvia

Associate Diploma in Computer Support and Maintenance 2008 - 2012
Jūrmala Institute of Information Systems, Jūrmala, Latvia
