

Bertrand Castellano

Senior Integration Specialist

bertrand.castellano@example.com · +1 555-0116 · Austin, US

SUMMARY

Integration specialist with roughly a decade of experience wiring disparate systems together so they behave like one. I enjoy the unglamorous work of mapping fields, taming flaky APIs, and making sure data lands where it should without surprises.

EXPERIENCE

Senior Integration Specialist — Brightford Conduit Systems Austin, United States Own the integration platform connecting our commerce, billing, and fulfillment systems, and set the standards other teams build against. I led a migration off a brittle point-to-point setup toward a documented, event-driven approach that cut failed handoffs dramatically.	Sep 2023 - Present
Integration Engineer — Whitmore Lattice Technologies Manchester, UK Delivered partner integrations for a logistics platform, handling everything from auth handshakes to retry and reconciliation logic. I built a shared connector toolkit that turned multi-week onboarding into a few days for each new partner.	Nov 2021 - Sep 2023
Integration Developer — Cobblepath Interlink Group Denver, USA Built and maintained data-sync flows between internal CRM and finance systems. I introduced contract tests at the integration boundaries, which caught breaking schema changes before they reached production.	Sep 2020 - Oct 2021
Systems Integration Analyst — Marrowgate Bridgeworks Phoenix, U.S. Coordinated integrations across several legacy services during a platform consolidation. I documented the undocumented interfaces and untangled a handful of circular dependencies that had blocked earlier attempts.	Aug 2018 - Sep 2020
Junior Integration Engineer — Quillshire Datalink Partners Portland, U.S. Supported message-queue and file-based integrations between back-office systems. I owned the monitoring dashboards and gradually reduced the volume of silent failures the team had grown used to.	Dec 2016 - Jun 2018

SKILLS

- Postgresql
- C
- Microsoft SQL
- MySQL
- Communication
- Agile Scrum
- .NET 6
- Spring
- Rust
- PHP
- Xamarin/MAUI
- JavaScript

LANGUAGES

English (Bilingual), Uzbek (Upper-Intermediate), German (C2)

CERTIFICATES

Certified Integration Professional Mar 2021
Enterprise Connectivity

PREFERENCES

On-site · Part-time · Temporary

LOOKING FOR

Looking for a role where integration work is treated as a first-class engineering problem, with room to standardize patterns rather than fight one-off fires.

HOBBIES

Integration Support Engineer — Aldersgate Signal Works	Oct 2015 - Dec 2016	Restoring vintage bicycles and long weekend hikes.
Riga, Latvia		
Handled day-to-day support for inbound and outbound data interfaces, triaging failures and coordinating fixes with upstream providers. I built a runbook that let the support rotation resolve common breakages without escalating.		

PROJECTS

Unified Provisioning Gateway

Built a central integration gateway that orchestrated provisioning across several cloud services for a hosting product. I designed the pipeline so each environment promotion was automated and auditable, and added the messaging layer that decoupled the slow upstream calls.

Tech: JavaScript, CI/CD (Gitlab, Jenkins), Kotlin, Microsoft SQL

EDUCATION

Master of Science in Software Engineering	2012 - 2014
Pennington Strand University, Austin, US	
Bachelor of Science in Computer Science	2009 - 2012
Holloway Crest College, San Antonio, Latvia	
Diploma in Network Administration	2006 - 2009
Westmere Technical Institute, El Paso, Germany
