

Anselm Rauchberg

System Administrator

anselm.rauchberg@example.com · +1 555-0164 · Stuttgart, Germany

SUMMARY

Systems administrator who keeps infrastructure quietly dependable, with a habit of automating the repetitive work before it becomes a fire drill. I enjoy untangling messy environments and leaving behind clear documentation and predictable maintenance routines.

EXPERIENCE

System Administrator — Schwarzwald Vector Hosting Jun 2024 - Present
Stuttgart, Germany

Maintain and harden the server and network estate for a mid-sized hosting operation, handling patching, backups, and incident response. Automate routine provisioning and monitoring so the team can focus on the cases that genuinely need attention.

IT Systems Engineer — Neckar Summit Datatech May 2023 - Jun 2024
Heilbronn, Germany

Ran the internal infrastructure for a growing engineering office, covering identity, storage, and virtualization. Led a migration to a more resilient backup scheme and cut recurring outages by stabilizing the update process.

Infrastructure Administrator — Alpenglass Cloud Werke Mar 2021 - May 2023
Augsburg, Germany

Administered hybrid environments spanning on-premise servers and cloud workloads, focusing on monitoring and capacity planning. Built scripted health checks that caught failures before users noticed them.

Junior System Administrator — Eisvogel Netzwerke Jan 2020 - Mar 2021
Ulm, Germany

Supported the operations team with ticket resolution, user account management, and routine server maintenance. Documented common procedures and helped standardize the onboarding setup for new workstations.

PROJECTS

Booking Platform Failover Overhaul

Re-architected the hosting and recovery setup for a travel agency's cloud-based booking platform so peak-season load no longer threatened uptime. Introduced automated failover and clearer

SKILLS

- Communication
- Docker Swarm
- NoSql
- Confluence
- Postgresql
- Azure
- Golang
- Linux
- Microsoft SQL
- Flutter
- iOS Development (Swift, Objective-C)
- WCF

English (Bilingual)

PREFERENCES

Hybrid · Contract · Temporary

runbooks, which shortened recovery during incidents and reduced manual intervention.

Tech: MySQL, Drupal, Communication, Haskell

Property Portal Build Toolchain

Stood up the administration and build environment behind a real estate development portal, supporting cross-platform client applications on Linux servers. Tuned the deployment pipeline and access controls so developers could ship without stepping on shared infrastructure.

Tech: C++, Swift, Xamarin/MAUI, Linux

EDUCATION

Bachelor in Network and Systems Engineering 2015 - 2019

Stuttgart University of Applied Informatics, Stuttgart, Germany

Diploma in IT Infrastructure Administration 2012 - 2015

Rheinland Technical Academy, Mannheim, UK
