

Edwina Pemberton-Hollis

Senior Software Tester

edwina.pembertonhollis@example.com · +1 555-0144 · Manchester, UK

SUMMARY

Software tester who treats quality as a shared responsibility rather than a final gate. Over the past several years I have built a habit of asking the awkward questions early, automating the tedious checks, and keeping a close eye on the edges where defects love to hide.

EXPERIENCE

Senior Software Tester — Pennine Quality Forge

Oct 2023 - Jan 2026

Manchester, England

Lead testing strategy for a multi-team product, combining exploratory testing with a growing automation suite. Embed quality practices into the delivery process and mentor newer testers. Work closely with developers to catch issues long before release.

Software Test Engineer — Rheinblick Testlabor

Mar 2021 - Oct 2023

Cologne, Germany

Designed and maintained automated regression suites for a complex enterprise application. Partnered with cross-border teams to clarify requirements and reproduce defects. Improved test coverage and reporting visibility for stakeholders.

QA Analyst — Cedarpoint Verification Inc

Jan 2019 - Mar 2021

Denver, U.S.

Performed functional and exploratory testing across web and desktop products. Wrote detailed defect reports and collaborated with developers to confirm fixes. Began building automated checks for repetitive test scenarios.

PROJECTS

Heavy Machinery Control Validation

Built and executed a testing program for a desktop control application used in heavy machinery manufacturing. Focused on boundary conditions and failure modes that mattered most on the factory floor. Reduced escaped defects through structured exploratory sessions.

Tech: Python, C#, Windows Forms

Biotech Data Integrity Verification

Led testing for a biotechnology data platform with strict integrity and security requirements. Validated complex workflows and probed for vulnerabilities alongside the security team. Helped ensure reliable behavior under unusual data conditions.

Tech: Cyber Security, Unity, NoSql

Legal Workflow Assurance Suite

Owned quality verification for a corporate counsel workflow application. Designed test cases covering intricate approval paths and edge scenarios. Collaborated with developers to harden the platform ahead of each release.

Tech: Blazor, WCF, C#, .NET

EDUCATION

Bachelor of Science in Computer Science

2016 - 2018
