SKILLS

- Confluence
- MySQL
- NoSql
- Jira
- Gitlab
- Agile Scrum
- Postgresql
- Docker
- Docker Swarm
- Azure
- Drupal

LANGUAGES

English (Bilingual), Spanish (C1),
Russian (Full Professional), Hebrew
(B2)

PREFERENCES

Hybrid, Remote · Part-time

SUMMARY

Junior data scientist who likes turning messy operational records into clear, decision-ready insight. I enjoy framing business questions as testable models and pairing closely with analysts to validate what the numbers actually mean.

EXPERIENCE

Junior Data Scientist — Silkstream Analytics Collective Jul 2025 - Present
Tashkent, Uzbekistan

Build and evaluate predictive models for customer behaviour and help the analytics team automate recurring reporting. I prepare cleaned datasets, run experiments, and present findings to non-technical stakeholders in plain language.

Data Science Intern — Cobalt Harbor Insights Jan 2025 - Jul 2025
Austin, USA

Supported a small research team on feature engineering and exploratory analysis for early-stage modelling work. I documented data pipelines and contributed reusable notebooks that sped up onboarding for new analysts.

PROJECTS

Regional Water Demand Forecasting Platform

Built a forecasting tool that estimated household and municipal water demand using historical consumption and survey panels, helping a market research team prioritise field studies. The work combined a desktop dashboard with an automated provisioning layer so analysts could refresh forecasts without engineering support.

Tech: Avalonia, Ansible, Haskell, Postgresql, Swift

EDUCATION

BSc in Applied Mathematics and Statistics 2021 - 2024
Zarafshan Institute of Applied Sciences, Tashkent, Uzbekistan

Diploma in Data Analytics 2018 - 2021
Oxus Valley Polytechnic, Samarkand, Uzbekistan

CERTIFICATES

Certified Applied Machine Learning Practitioner Apr 2026 – Apr 2029
Predictive Modelling Track

Statistical Foundations for Data Science Apr 2026

HOBBIES

Long-distance cycling, sketching, and casual chess tournaments.
