

Spencer Hartwell

Product Owner

spencer.hartwell@example.com · +1 555-0127 · Seattle, USA · DOB: 20 Feb 1999

SUMMARY

Product owner who enjoys turning fuzzy customer problems into clear, shippable roadmaps. I work closely with engineering and design to prioritize ruthlessly and keep teams focused on outcomes that matter. I lean on data and direct customer conversations to make sure we build the right thing.

EXPERIENCE

Product Owner — Northwind Product Studio May 2025 - Present
Seattle, U.S.

Own the backlog and roadmap for a customer-facing product line, balancing user needs against technical constraints. Partner with engineering and design to define and prioritize work each sprint. Translate stakeholder goals into clear acceptance criteria the team can build against.

Associate Product Owner — Cascade Forge Apps Jul 2024 - May 2025
Portland, USA

Supported product planning by refining the backlog and writing detailed user stories. Ran discovery sessions with customers to validate ideas before committing engineering effort. Tracked release outcomes and fed learnings back into the roadmap.

Product Analyst — Granite Harbor Software Jun 2023 - Jul 2024
Denver, U.S.

Analyzed usage and feedback data to inform product decisions and prioritization. Built lightweight prototypes and specs that helped teams align early. Coordinated across engineering and support to keep delivery on track.

Business Analyst — Dzintarkrasts Digital Dec 2021 - May 2023
Riga, Latvia

Gathered and documented requirements for software delivery teams serving regional clients. Mapped business processes into clear specifications for developers. Acted as a bridge between non-technical stakeholders and the engineering team.

PROJECTS

Infrastructure Service Catalog Revamp

Led the product direction for an internal service catalog used to manage ICT infrastructure requests. Reworked the request flows and data model so teams could provision and track services with far less friction. Prioritized the roadmap around the requests that were costing teams the most time.
Tech: Java, NoSql

Secure Workforce Access Portal

Drove requirements for a secure access portal serving network providers and HR functions. Worked alongside security specialists to balance tight access controls against a smooth user experience. Coordinated delivery through shared pipelines so changes shipped safely and predictably.
Tech: Gitlab, Spring

Clinic Operations Companion Platform

SKILLS

- Jira
- CI/CD (Gitlab, Jenkins)
- Gitlab
- Communication
- Sql
- Agile Scrum
- Linux
- Confluence
- Unity
- NoSql
- CSS

LANGUAGES

English (Bilingual), Spanish (C2), German (B1)

PREFERENCES

On-site, Hybrid · Full-time

HOBBIES

Cycling, cooking, and weekend photography.

Owned the product vision for a companion platform supporting hospital and clinic operations across web and mobile. Prioritized features that reduced administrative load for clinical staff. Aligned a cross-functional team around a clear, outcome-driven roadmap and shared documentation.

Tech: Linux, Confluence, Traefik, Xamarin/MAUI, Golang
