

Ritvars Salenieks

Senior Networking Specialist

ritvars.salienieks@example.com · +1 555-0162 · Riga, Latvia

SUMMARY

Senior networking specialist with over a decade spent designing, securing, and troubleshooting enterprise networks. I like the discipline of network engineering: clear topologies, tight change windows, and monitoring that tells you about a problem before a user does.

EXPERIENCE

Senior Networking Specialist — Daugava Network Systems

Dec 2023 - Present

Riga, Latvia

Own the design and operation of a multi-site enterprise network, leading segmentation and resilience improvements. Coordinate maintenance windows and vendor work so that critical links stay redundant and observable.

Network Engineer — Baltic Mesh Communications

Sep 2021 - Dec 2023

Jurmala, Latvia

Maintained core routing and switching for a regional service provider and resolved complex connectivity incidents. Rolled out improved monitoring that caught capacity issues well before they affected customers.

Network Administrator — Vidzeme Fiber Works

Nov 2019 - Aug 2021

Cesis, Latvia

Administered campus networks and wireless infrastructure for a large organization, handling configuration and access control. Standardized device configurations to make troubleshooting faster and audits cleaner.

Network Support Engineer — Kurzeme Link Solutions

Jun 2017 - Sep 2019

Ventspils, Latvia

Supported branch-office connectivity and VPN access for distributed teams, responding to outages on call. Documented recurring failure patterns that informed later hardware refresh decisions.

Junior Network Technician — Gauja Datacom

May 2016 - Jun 2017

Valmiera, Latvia

Installed and configured switches and access points, and assisted senior engineers with cabling and labeling. Built the habit of meticulous documentation that I carried through the rest of my career.

Network Operations Technician — Amber Route Networks

Sep 2014 - Apr 2016

Liepaja, Latvia

Monitored network health from an operations center and escalated incidents according to defined procedures. Helped tune alert thresholds to cut down on noise without missing real problems.

PROJECTS

Connected Insights Platform for Supply Chain Research

Acted as product owner for an interactive analytics tool that visualized market and logistics data for research teams. Shaped the roadmap and prioritized features so that complex supply-chain signals were presented in a way decision-makers could explore directly.

Tech: Unity, JavaScript, C++

EDUCATION

Bachelor of Engineering in Telecommunications and Networking Riga Technical College of Communications, Riga, United States	2009 - 2013
Professional Diploma in Network Infrastructure Engineering Latgale Institute of Information Technology, Rezekne, Latvia	2007 - 2009
Vocational Certificate in Computer Network Systems Zemgale Polytechnic, Jelgava, Latvia	2005 - 2007
