

Jovliyon Tursunbaev

Lead System Administrator

jovliyon.tursunbaev@example.com · +1 555-0186 · Tashkent, Uzbekistan · DOB: 06 Jan 1988

EXPERIENCE

Lead System Administrator — Silkroad Datavault Holdings

Jan 2023 - Present

Tashkent, Uzbekistan

Lead a small team responsible for the company's core server estate, virtualization hosts, and internal directory services. Own incident response, capacity planning, and the rollout of automated patch and backup routines across the fleet. Coordinate with developers to keep staging and production environments consistent and reliably available.

Senior Infrastructure Administrator — Baltijas Serveru Nams

Jul 2020 - Jan 2023

Riga, Latvia

Maintained multi-tenant hosting infrastructure and led the migration of legacy physical workloads onto a consolidated virtualization platform. Set up monitoring and alerting that cut unplanned downtime and gave the team early warning of disk and memory pressure. Documented runbooks so on-call rotations could resolve common faults without escalation.

Systems Administrator — Zarafshan Cloud Systems

Nov 2017 - May 2020

Samarkand, Uzbekistan

Administered Linux and Windows servers supporting a regional services provider, including mail, file shares, and internal web applications. Built scripted provisioning so new servers could be brought online consistently within hours instead of days. Handled routine hardening, access reviews, and recovery drills.

IT Operations Administrator — Oltin Vodiy Networks

Oct 2015 - Sep 2017

Tashkent, Uzbekistan

Kept the day-to-day IT operations running for a growing technology firm, covering servers, network gear, and end-user support escalations. Introduced a ticketing discipline that made workload visible and helped prioritise recurring problems. Assisted with the first office-wide structured backup strategy.

Junior System Administrator — Registon Software Works

Jan 2014 - Oct 2015

Bukhara, Uzbekistan

Supported a development house by maintaining build servers, version control hosts, and shared development environments. Automated repetitive maintenance tasks and helped keep the engineering team unblocked during releases. Learned to triage hardware and network faults quickly under deadline pressure.

IT Support Specialist — Chust Digital Infrastructure

Dec 2011 - Jan 2014

Tashkent, Uzbekistan

Provided first- and second-line support for staff workstations, printers, and core line-of-business applications. Maintained inventory and helped standardise software images across departments. Took on early server-room responsibilities such as monitoring power, cooling, and routine reboots.

PROJECTS

Provider Edge Routing Mesh

Designed and operated the routing and ingress layer for a market-research data platform shared across several regional network providers. Built a self-service deployment pipeline so analysts could publish dashboards without manual intervention. Focused on resilient traffic routing and predictable failover between regions.

Tech: Gitlab, Nginx, Traefik, Haskell

Electronics Yield Reporting Console

Built a reporting layer over a manufacturing data warehouse that turned raw production records into readable yield and defect summaries. Designed the queries and styling so plant supervisors could read trends at a glance. The console replaced a fragile spreadsheet process and reduced reporting effort considerably.

Tech: Sql, CSS

Security Operations Toolkit

Assembled an internal toolkit that unified host monitoring, access auditing, and a small operator dashboard for a security and marketing analytics team. Tied together several services so administrators could investigate alerts from one place. Emphasised tamper-evident logging and clear, role-based access.

Tech: Avalonia, ASP.NET, Python, Unity, C

EDUCATION

Master of Science in Information Systems Engineering 2007 - 2010

Tashkent Institute of Applied Computing, Tashkent, Uzbekistan

Bachelor of Science in Computer Networks and Administration 2004 - 2007

Zeravshan Technical University, Samarkand, Uzbekistan

Diploma in Computer Hardware and Systems Support 2002 - 2004

Fergana College of Information Technology, Fergana, Uzbekistan

SKILLS

- Communication
- MySQL
- Ansible
- Docker
- NoSql
- Microsoft SQL
- Agile Scrum
- PHP
- iOS Development (Swift, Objective-C)

LANGUAGES

English (Bilingual), Russian (Intermediate), French (Bilingual), Hebrew (Intermediate)
