

Hollis Wexcombe

Lead Security Specialist

hollis.wexcombe@example.com · +1 555-0169 · Bristol, England

SUMMARY

A security specialist focused on hardening systems before attackers find the gaps, with a steady record of leading detection and response efforts. Equally comfortable in a threat-modelling workshop and in the middle of a live incident. Believes good security is mostly good habits made repeatable.

EXPERIENCE

Lead Security Specialist — Ironvale Threat Defense Group May 2023 - Jan 2026
Austin, USA

Leads a security operations team responsible for detection engineering, incident response, and threat hunting across a global estate. Sets the security baseline and reviews architecture changes for exposure before release. Mentors analysts and runs post-incident reviews that feed back into stronger controls.

Senior Security Engineer — Greyhallow Cyber Works Mar 2020 - May 2023
London, UK

Built and tuned detection pipelines and led containment during high-severity incidents. Drove a programme to reduce standing access and enforce least-privilege across critical systems. Partnered with engineering teams to embed security checks into delivery pipelines.

Information Security Analyst — Stonehaven Assurance Lab Jul 2017 - Feb 2020
Bristol, England

Monitored alerts, investigated suspicious activity, and coordinated remediation with system owners. Conducted vulnerability assessments and tracked findings to closure. Authored internal guidance that raised baseline security awareness across teams.

Security Operations Analyst — Mirefield Secure Systems Apr 2014 - Jul 2017
Manchester, UK

Triaged security events and escalated genuine threats with clear evidence and timelines. Maintained and improved alerting rules to cut down on noise. Supported access reviews and routine control audits.

Junior Security Analyst — Thornwick Risk Collective Jul 2011 - Apr 2014
Leeds, United Kingdom

Assisted with log review and basic incident triage under senior supervision. Helped maintain asset inventories and patch-status reporting. Built foundational skills in threat detection and secure configuration.

IT Security Associate — Ashcombe Network Guard Jan 2009 - Jun 2011
Glasgow, United Kingdom

Supported day-to-day security operations including account provisioning and firewall change reviews. Documented procedures and helped enforce policy compliance. Provided first-line response to reported security concerns.

EDUCATION

Bachelor of Science in Cyber Security and Networks 2006 - 2008
Wessex Polytechnic of Computing, Bristol, England

SKILLS

- Python
- Linux
- Communication
- Jira
- Cyber Security
- Confluence
